Welcome message from the Congress President

Dear Colleagues,

In the name of the Belgian Section for Obesity and Metabolic Surgery I welcome you at the 6th congress of the International Federation for the Surgery of Obesity and Metabolic Disorders, held in Brussels.

With the help of our scientific committee we were able to compose a very interesting scientific program. We will express our special gratitude to the entire faculty who made this outstanding scientific program possible.

We are also proud to organize the 3rd European Obesity Medico-Surgical Workshop as a formal satellite of the IFSO EC 2014 jointly organized by IFSO EC and EASO. In this one-day workshop surgeons and endocrinologists will have the opportunity to discuss items of common interest.

Since Belgium is the world leader off the highest quality beers with more than 600 different beers, we would like to invite you to taste as many of these beers as possible without forgetting the Belgian fries with mayonnaise, chocolates and good Belgian food. Don’t forget the social program that will show you some other Belgian highlights.

We are convinced you will have an unforgettable stay in Belgium.

Welcome to Brussels.

Luc Lemmens

Welcome message from the IFSO EC President

Dear Colleagues and Friends

It is my honor and pleasure to invite you to take part in the 6th Congress of The IFSO- European Chapter. After previous successful meetings in Prague (2004), Lyon (2006), Capri (2008), Lausanne (2010) and Barcelona (2012) in 2014 we meet in Brussels – the capital of Belgium – a country where bariatric and metabolic surgery for many years had the highest scope of population by bariatric care in Europe. Many bariatric surgeons working worldwide started their bariatric experience here under the mentorship of the prominent Belgian bariatric surgeons.

We have many topics to discuss: new technical and mini-invasive opportunities in Bariatric Surgery, optimal approaches for surgical treatment of Diabetes Mellitus, surgical options for children and adolescents, for the patients with BMI <35, interdisciplinary approaches to bariatric patients. The Third European Obesity Medico-surgical Workshop will be devoted to Guidelines and Clinical applications of Metabolic Surgery. Leading European experts, both surgeons and non-surgical professionals will exchange their opinions regarding their optimal collaboration in treatment Diabetes Mellitus. Many bariatric experts from all over the world, not only from Europe are invited to share their experience with the participants during both Plenary Sessions, Symposia and Postgraduate Courses. International Bariatric Club Symposia and Live Surgery sessions have also become a good tradition of our Congresses.

We expect excellent and fruitful meeting in the friendly atmosphere of the capital of Europe.
Welcome to Brussels.
